Top 5 Product by Sales

Sales by Category

- **~2K** SKUs are low in stock, especially in high-demand categories, posing a risk of lost sales.
- **~1K** SKUs are overstocked, indicating inefficient inventory utilization and excess holding costs.
- Inventory distribution is uneven across stores, creating simultaneous stockouts and overstock situations.
- Stock levels are not aligned with demand trends, highlighting gaps in forecasting and replenishment planning.
- Improving stock availability for high-demand SKUs can significantly improve sales conversion and reduce lost revenue.

Monthly Revenue Loss Trend (Low Stock)

Potential revenue loss remains consistent across months, indicating ongoing demand-supply mismatch in low-stock products.

Potential Lost Sales by Product_Name

- **High-volume, low-stock SKUs** must be given top priority for replenishment to avoid further revenue erosion.
- Buy low volumes of overstocked items, basing orders on trends rather than demand forecast.
- Distribute existing inventory from **overstocked stores to under-stocked stores** (redistribute inventory), simultaneously minimizing stockouts and overstocking.
- Inventory Allocation Optimization can release value up to **~11.8M** by minimizing stock-outs and inventory overstock.
