Professional Summary

Operations and Data Analytics professional with a Master's in Big Data Analytics and experience supporting operational Early-career technology and data professional with a Master's in Big Data Analytics and a Bachelor's degree in Computer Science and Engineering, with hands-on experience in Python, SQL, data engineering, machine learning, data visualization, and AI-focused projects. Experienced in developing data-driven solutions, troubleshooting technical problems, automating workflows, and translating complex requirements into practical solutions. Demonstrated ability to learn emerging technologies quickly, collaborate across teams, and apply analytical problem-solving to real-world challenges. Strong interest in artificial intelligence, generative AI, agentic workflows, cloud technologies, automation, and scalable software solutions.

Education

Trent University **Peterborough, Canada**
Master of Science (M.Sc) in Applied Modelling and Quantitative Methods (Big Data Analytics) 2023-2024
Relevant Courses**:** Data Mining, R Analytics, Statistical Modelling, Python for Data Science, Big Data Systems, Foundations of Modelling

KINGS Engineering College, **Chennai, India**
Bachelor of Engineering (B.E.) in Computer Science and Engineering 2018-2022
Relevant Courses: Data Structures, DBMS, Machine Learning Techniques, Data Analytics, Cloud Computing

Work Experience

Healthy Planet **Peterborough, Canada**
Store Operations Lead(*Data & Reporting Focus)* September 2025 – Present

- Developed a Power BI dashboard using 2,000+ rows of operational and product data, transforming raw information into interactive reporting and actionable business insights.
- Worked with Microsoft Dynamics 365 NAV and operational workflows, gaining practical exposure to ERP data, inventory processes, and business systems.
- Used Excel and Power Query to organize, transform, and reconcile operational information, improving reporting consistency and reducing repetitive manual activities.
- Investigated data discrepancies and unexpected results, identified potential root causes, and communicated findings to operational stakeholders for resolution.
- Documented processes and reporting requirements to improve consistency, knowledge transfer, and operational continuity.
- Gained hands-on exposure to ERP data structures and business workflows through work with Microsoft Dynamics 365 NAV.

Sales Associate Apr 2024 – Aug 2025

- Delivered friendly, high-energy customer service in a fast-paced retail environment, assisting guests with product selection and creating positive in-store experiences.
- Operated POS systems, handled cash and card transactions accurately, and balanced registers while maintaining strong attention to detail.

KINGS ENGINEERING COLLEGE **CHENNAI,India**
IT & Systems Administrator *Aug 2022 – Aug 2023*

- Supported undergraduate students during laboratory sessions by explaining technical concepts, demonstrating software and programming procedures, and providing one-on-one assistance.
- Guided students through programming exercises, assignments, and practical lab activities while encouraging independent problem-solving and logical thinking.
- Identified gaps in students' understanding and adapted explanations to help them approach technical problems more effectively.
- Assisted students with troubleshooting programming, software, and computer-related issues in a structured academic environment.
- Supported instructors with laboratory preparation, student assistance, and smooth delivery of practical sessions.
- Communicated complex technical concepts clearly to students with varying levels of technical knowledge.

- Maintained a professional, patient, and supportive learning environment while assisting multiple students during scheduled laboratory sessions.

Projects

Loan Prediction Using ML & GPT-2 *Dec 2024*

- Developed a machine learning model using Random Forest for predicting loan eligibility with 89% accuracy and integrated a GPT-2-based explainable AI module to generate textual insights behind predictions, enhancing transparency for non-technical stakeholders.
- Processed and cleaned a dataset of over 30,000 records and visualized key trends with Tableau dashboards, demonstrating expertise in data wrangling and visualization.

Apache NiFi vs. Google BigQuery – Data Ingestion Benchmark *May 2024*

- Developed and implemented high-performance data pipelines using NiFi and BigQuery, achieving a 40% speed improvement in data processing.
- Performed pipeline validation, monitoring, and troubleshooting to evaluate scalability, reliability, and system performance across multiple ingestion environments.
- Documented the results in a detailed technical report, showcasing my ability to analyze, test, and present findings on data governance and scalability.

Breast Cancer Detection Using Neural Networks *May 2022*

- Built a deep learning model using TensorFlow, achieving 95% classification accuracy for early-stage breast cancer using diagnostic data.
- Used Python libraries such as Pandas and NumPy to process and analyze large log datasets for system performance tracking and anomaly detection.
- Trained on open-source medical datasets and tuned hyperparameters using Grid Search for optimal results.

Additional Information

Technical Skills

- **Languages:** Python (Pandas, NumPy, ETL scripting, data validation), R (statistical modelling), SQL (CTEs, window functions, query optimization)
- **Cloud Technologies:** Google Cloud Platform (BigQuery, Cloud Storage, Cloud Functions, Cloud Composer), cost-efficient querying (partitioning, clustering), cloud-based ETL
- **Databases:** MySQL, SQL Server, Workbench, BigQuery datasets, schema design, and indexing strategies
- **Visualization & BI Tools:** Tableau (LOD expressions, interactive dashboards), Power BI (DAX, star schema modelling), Excel (Power Query, Power Pivot, automated reporting)
- **Other Tools:** Git, Jupyter Notebook, RStudio, Google Cloud Studio, API consumption, JSON/CSV/Parquet handling

Certifications

- Google Cloud – Database Engineer (Sept 2024) – Coursera
- Databases & SQL for Data Science with Python (Apr 2024) – Coursera
- Tableau 2024.1: Essential Training (Apr 2025) – LinkedIn Learning
- Python Essential Training (May 2025) – LinkedIn Learning
- Excel Advanced Functions (2022) – Coursera
- AMOD Work Readiness Training Certificate (May 2024)
